ABOUT

AI/ML Engineer with a completed MCS from Virtual University of Pakistan, specializing in Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, and AI Agents. Builds intelligent automation pipelines using n8n and deploys AI-powered systems. Creator of HNAI.Researcher, a free open-source AI/ML education platform for students in Pakistan and beyond. Actively seeking fully-funded MS and PhD scholarship opportunities in Artificial Intelligence at leading international universities.

TECHNICAL SKILLS

Programming	Python, Java
ML / DL Frameworks	TensorFlow, PyTorch, Keras, Scikit-learn
Data & NLP	Pandas, NumPy, NLTK, Matplotlib
Tools & Platforms	n8n, Groq, Docker, GitHub, Jupyter, VS Code

PROJECTS

Python for Everyone — AI-Powered Python Learning Platform

React · Node.js · MySQL · Manus · Live 2026

A fully deployed AI-powered Python learning platform combining Google's Crash Course on Python, Python for Everybody, and Andrew Ng's AI Python curriculum. Features 11 structured modules, a 24/7 AI Chat Tutor, 50+ runnable code examples, YouTube content automation, student progress tracking, bookmarking system, and an admin dashboard. Live at n8nyoutube-86f6uahs.manus.space

HNAI.Researcher — Free AI/ML Education Platform

GitHub Pages · Open Source · 2025–Present

An open-source AI & ML education platform built for students in Pakistan and beyond. Covers 6 structured learning tracks — Python for AI, Machine Learning, Deep Learning, NLP & LLMs, Computer Vision, and MLOps & Deployment — with 24+ lessons, hands-on projects, and a Research Archive. Completely free, no paywalls.

n8n AI Automation Pipelines

n8n · Groq · Docker · 2025–Present

Built a suite of intelligent automation workflows using n8n and Groq (LLaMA models) — including a Daily Vocabulary Builder posting AI/ML terminology to Facebook, LinkedIn, and Gmail three times daily; social media scheduling pipelines; and a YouTube lecture-to-study-notes converter via Google Docs. Runs on Docker with NocoDB, PostgreSQL, and Qdrant.

OpenClaw WhatsApp AI Agent

Node.js · Groq · Llama 3.3 70B · 2026

Deployed a local WhatsApp AI agent (OpenClaw v2026.4.1) powered by Groq's Llama 3.3 70B model. Built with Node.js and run locally on Windows, with full project backed up to GitHub. Evaluated and chose local deployment over Oracle Cloud and Railway.app for reliability and control.

Personal Portfolio Website

GitHub Pages · HTML / CSS · 2025

Designed and deployed a personal portfolio hosted on GitHub Pages, showcasing projects, skills, and academic background with a clean, professional layout.
